

## **REFINERS IN OUR DIRECT MATERIAL SUPPLY CHAIN FOR HIGH-VOLTAGE BATTERIES**

Stellantis is committed to growth founded on social-responsible actions and behaviours in all countries in which it operates and in all fields in which it does business.

Stellantis is actively practicing its due diligence to comply with social standards all along its supply chain and more specifically on risks connected with low-emission mobility (electric and hybrid vehicles). Therefore, we have chosen RCS Global and NQC as our partners to execute our project on raw material transparency. We are mapping and auditing the supply chain of our high-voltage battery suppliers. Audits are conducted based on the OECD Due Diligence Guidance.

The key figures, as of April 20, 2022\*) are:

- **519** unique suppliers identified all along the supply chain, from the mine to our plants;
- **47** audits done, including 28 action plans agreed by the suppliers.

The following lists shows the identified suppliers within the Stellantis Lithium, Cobalt, Nickel and Graphite supply chain.

1. Below table shows the countries of refiners
2. Table on next page shows the detailed list

<b>Material</b>	<b>Country of origin - Refiner</b>
